## **DETAILED ACTION**

### ***Response to Amendment***

This Office Action is responsive to the Amendment filed December 29, 2005. The rejection of claims 1,2 & 8-23 under 35 U.S.C. 102(b) as being anticipated by Sansone et al. WO 98/14505 is overcome. However, claims 1,2 & 8-23 are newly rejected under 35 USC 112, first paragraph. A brief reiteration is recited below.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2 & 8-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not provide support for a non-porous membrane. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,2 & 8-23 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for impregnating a porous membrane with six or more strong acid molecules, does not reasonably provide enablement for impregnating a non-porous molecule. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. It is unclear as to how a non-porous membrane can be impregnated with strong acid molecules.

***Response to Arguments***

Applicant contends that Sansone is not anticipatory because the reference is silent to a non-porous membrane. This argument is persuasive although the specification does not provide support for a non-porous membrane. Specifically, Application has amended the specification to cite U.S. Patent No. 6,352,742 that claimed benefit to Japanese Patent 10-

1255602, wherein support for amended claim 1 is found in newly incorporated by reference 6,352,742. Amending the claims and simultaneously incorporating a reference to support the amendment is not adequate support for the amendment to claims. However, the rejection is overcome because Sansone is silent to impregnating a non-porous membrane with a strong acid. Nonetheless, once the new matter is removed, the 102(b) rejection will be reapplied.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
